Contact us to find out how we can help you

Our Commitment

At Keystone Labs, we are committed to providing superior quality testing solutions to regulated industries. Our team brings a unique combination of experience, quality, reliability, and technical diversity that is among the best available in the industry.

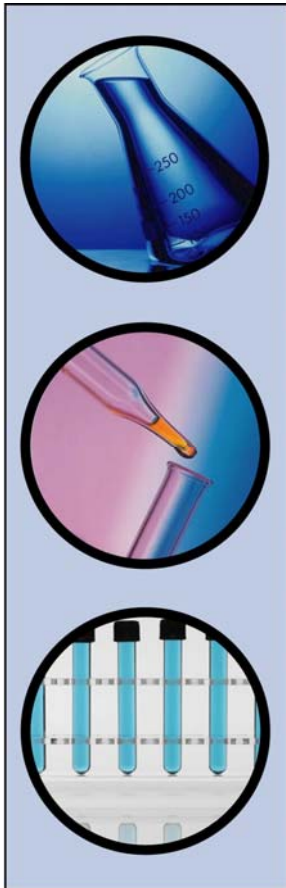

Our Capabilities

We are a customer focused company, tell us where you want to be and we will help you get there. Our emphasis is on delivering customized solutions to your testing requirements and providing outstanding customer service. Our client management approach ensures that your projects are executed effectively and efficiently.

KEYSTONE LABS

Providing high quality testing services to regulated industries

Our Service

- We offer both standard and rush turnaround times allowing flexibility for our clients.
- Single point of contact for tracking sample progress: you have access to a testing expert who will be able to answer technical questions and concerns about your sample, data, or other information.
- We have a full complement of quality services: including the ability to answer questions about test methods, validation, quality or testing regulations.

Our Quality Commitment

- We have been audited by Health Canada and hold an establishment license for GMP testing. You can be confident that our systems can stand up to rigorous scrutiny.
- Quality System: We are confident in our quality system which serves as a check and balance for the testing we perform and all of the data we provide you. Our quality approach focuses on continuous training, validation, and standard operating procedures.

Our Data

- Interim results can be made available, letting you know that tests are progressing as expected.
- Electronic copies of the data are available immediately; original test summaries follow via mail. This allows you to proceed with critical decision making with data on hand, immediately after testing is complete – as if you have your own testing lab in-house.

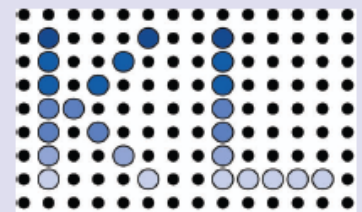

NEW: Take advantage of our new client login feature with communication forum and file sharing capabilities. Inquire for more details.
